**Group #1**

How do we share our successes? How do we talk to each other and how can we share lessons learned and resources?

Engagement with Indigenous Nations

Database of resources- list of resources available for designing programs

How do we can connect people to organization programs active under AFER

-calendar of events to identify timing

-Calendar/master list of funding -->database so we can better work together

-Getting on the agenda at an educators conference -- UBC conference for example (better integration with schools)

-Establishing a directory ---have a database of contact info, know who to reach out to if you want to collaborate and identify what you can offer as an organization

-There will be an Oceans Centre at SFU --could be good place to connect to

-In-person networking once we can

## **Group #2**

-sharing job opportunities among the Network

-creating a structure for asks and offers for initiatives you want volunteers for

-centralized place, email thread or something similar

-quarterly meetings

-clearly communicating what the Network will do and participation involved

-mapping out how this network intersects with others

-identifying how to connect with Indigenous nations
