

Breakout Group A

Prioritizing next steps

Rank the following from most to least important to this working group.

What does success in each step look like?

1) Connecting to other groups and communities (e.g. teachers, Nation other networks)

Recruiting new members for this group

Creating and maintaining a digital calendar of programs & initiatives

Creating a database of existing watershed resources

What expectations or guiding principles should be set for participation in this group? Realistically, what does each member have the bandwidth to contribute to the Network?

Clarity on what this circle is and how it connects with other circles?

Audience? Education - Who? K-12 or post secondary? Very different. New immigrant community?

Interest in supporting schools and teachers but no teachers represented!

Breakout Group B

Prioritizing next steps
Rank the following from most to least important to this working group.
What does success in each step look like?

Creating and maintaining a digital calendar of programs & initiatives

Creating a database of existing watershed resources

Not necessarily more important, but important that they come first so the group has more of an identity when approaching others.

Do our homework before bringing new folks in. Top two will lead to bottom two.

Building a program database on a drive that folks can easily add into

Understand what resources are being accessed (track downloads)

Recruiting new members for this group

Connecting to other groups and communities (e.g. teachers, Nations, other networks)

What expectations or guiding principles should be set for participation in this group?
Realistically, what does each member have the bandwidth to contribute to the Network?

Participation in conversations/discussions

Willingness to share

More in-depth on particular topics, more infrequently

Sharing what we're doing and learning what others are doing.

Be the conduit to direct teachers to shared resources

Breakout Group C

Prioritizing next steps
Rank the following from most to least important to this working group.
What does success in each step looks like?

Creating and maintaining a digital calendar of programs & initiatives

Creating a database of existing watershed resources

Recruiting new members for this group

Connecting to other groups and communities (e.g. teachers, Nations, other networks)

What expectations or guiding principles should be set for participation in this group?
Realistically, what does each member have the bandwidth to contribute to the Network?
